Technological inclusions have a significant impact on the teaching and learning process. The education community has to constantly upgrade itself to keep itself abreast of modern learning. # **AMITY VIRTUAL MOOT COURT COMPETITION , 2020**

The Coronavirus is making victims around the globe, and creating a catastrophe in the nation. The health and safety of communities and attendees is of course the first priority for every organisation that hosts an event and taking the current situation into consideration Amity Law School, Noida is hosting its very first online moot.

We turn to extra curricular activities to get through difficult times, so it's been hard to grapple with social distancing, cancelled events, and the closure of venues during the COVID-19 outbreak. However, mooters are nothing if not adaptable, especially when facing challenges. It has been heartening for Amity Law school to organize a digital event, in an effort to support Law students from all over the nation and to provide an enriching experience for those isolated at home as COVID-19 continues to spread.

## **MOOT PROPOSITION**

The problem is related to the production and development of an extremely dangerous biological weapon (a virus), by a State that is party to biological weapons convention. The virus mutate from person to person and led to a global pandemic mainly because of the non-disclosure of the adequate information regarding the nature of the virus by that State. The pandemic led to death of millions of people and violations of various human rights and loss to global economy. A case is filed before the ICJ, invoking State responsibility and to claim reparation.
