Section : Analytical & Logical Reasoning

Ques 1.

Read the paragraph carefully and determine the main point the author is trying to make. What conclusion can be drawn from the argument? Each paragraph is followed by five statements. One statement supports the author's argument better than the others do.

Today's high school students spend too much time thinking about trivial and distracting matters such as fashion. Additionally, they often dress inappropriately on school grounds. Rather than spending time writing another detailed dress policy, we should make school uniforms mandatory. If students were required to wear uniforms, it would increase a sense of community and harmony in our schools and it would instill a sense of discipline in our students. Another positive effect would be that teachers and administrators would no longer have to act as clothing police, freeing them up to focus on more important issues.

This paragraph best supports the statement that

- | | |
|--|---|
| 1. students who wear school uniforms get into better colleges. | 2. teachers and administrators spend at least 25% of their time enforcing the dress code. |
| 3. students are not interested in being part of a community | 4. school uniforms should be compulsory for high school students. |

Ans. school uniforms should be compulsory for high school students.
